

IMO A.581 -certificate ensures that 8 pcs of yellow marked ferry attachments are mounted on the chassis.

With Alcoa dura bright alloy wheels you are able to shave of those last kilograms.

The **EkeLoad** beams allow for two-layer loading.

A unit with doors on both sides can also be equipped with a heater or cooling unit (without ATP).

Doors on both sides

Ekeri products are also available with doors on two sides. This means that loading and unloading can be carried out from both sides. It is therefore easier to achieve full loads and avoid driving empty.

The version with doors on two sides combines the flexibility of a curtain sided unit with the security of a unit with solid walls. No cargo is too difficult for this option.

Doors on both sides are available on dry freight and ADREXIII solutions.

Doors on both sides products are available on the following chassis types:

CENTRE-AXLE TRAILERS

STEP-FRAME SEMI-TRAILERS

DRAWBAR-TRAILERS

CITY SEMI-TRAILERS

SEMI-TRAILERS

TRUCK BODIES
