

Insulated tarpaulin roof is also available.

Additional lashing rings tested to a breaking force of 4t and 2t.

From Ekeri you'll always get high quality tires.

As floor surfaces you can have wisatrans or aluminium.

Tarpaulin roof

Tarpaulin roofs are also an optional feature for Ekeri units. They allow for easier loading and unloading from above, for example when the load contains large concrete elements or construction materials and parts which must be loaded and unloaded with crane.

Maximises dry freight possibilities. The tarpaulin roof also has a very good side loading height and a roof that opens from both rear- and front(optional) end.

The box body with tarpaulin roof is suitable for the demanding conditions of the North.

Tarpaulin roof are available on the following chassis types:

CENTRE-AXLE TRAILERS

STEP-FRAME SEMI-TRAILERS

DRAWBAR-TRAILERS

CITY SEMI-TRAILERS

SEMI-TRAILERS

TRUCK BODIES
